QUALIFICATION SUMMARY

Materials Scientist with over 9 years of experience in materials formulation design, materials characterization, MD simulation and data analysis. Extensive hands-on experiences in the cleanroom. Expertise in collaborating and conveying technical insights to industrial partners.

EDUCATION

Ph.D. in Macromolecular Science and Engineering 09/2021 - 07/2025

University of Michigan Ann Arbor, United States

Cumulative GPA: 3.97/4.00, Rackham Predoctoral Fellowship (Awarded to 5% of Ph.D.)

M.S. in Materials Science and Engineering 09/2019 - 04/2021

University of Michigan Ann Arbor, United States

Cumulative GPA: 4.00/4.00

B.E. in Macromolecular Materials and Engineering 09/2015 - 06/2019

Nanjing Tech University Nanjing, China

Cumulative GPA: 3.55/4.00

SKILLS AND LEADERSHIP

Software: Materials Studio, GROMACS, C++, Python, MATLAB, AutoCAD

Material Characterization: SFG, FTIR, XPS, AFM, SEM, XRD, Ellipsometer, Raman, TGA, Circular Dichroism, Instron, Plasma Cleaner, UV-VIS, DSC, Profilometer, Contact Angle Goniometer.

Cleanroom: PVD, PECVD, ALD, Plasma cleaner, HF cleaning process

Lab Instrument and Safety Manager: Maintain and repair three laser systems (1 fs-laser and 2 ps-laser). Oversee all aspects of lab safety (Instrument operations, chemical handling and safety check).

Lab Mentoring: trained 10+ new students (Experiment design, instruments, simulations and lab safety)

Industrial Collaborations: Collaborate with Dow, BASF, Ford and Merck on 7 projects.

SELECTED PUBLICATIONS AND CONFERENCES

18 co-author papers, 5 first-author papers, 5 papers under review or in preparation (2 first-author papers), 4 conference presentations (2 oral and 2 poster)

RESEARCH EXPERIENCE

Surfaces and interfaces, Thin films deposition, Etching inhibitor, Electronic materials, Energy storage, Problem solving, Spectroscopy, Process optimization, Coating, MD simulation, Optics **Materials for semiconductor applications (Collaboration with BASF)**

- ✓ Developed a methodology for rapidly (2 min) achieving high-quality self-assembled monolayer (SAM) deposition of etching inhibitors (ODPA) on copper coated wafer surfaces.
- ✓ Developed an analytical methodology integrating XPS and SFG data to quantitatively assess the surface coverage, molecular orientation, and quality of ODPA thin films.
- ✓ Applied AFM and Ellipsometer to measure the thickness and of the ODPA monolayer film.
- ✓ Optimized the deposition process to achieve high-quality, uniform silica and metal thin coatings.
- ✓ Probed the ultrafast dynamics of semi-conducting polymers through pump-probe experiments.

Surfaces and Interfaces (Collaboration with DOW, BASF)

- ✓ Nondestructively unveiled the working mechanisms of the polydimethylsiloxane (PDMS) adhesives and polyurethane (PU) adhesives at the molecular level by Sum Frequency Generation (SFG) Vibrational Spectroscopy and Molecular Dynamics (MD) simulation.
- ✓ Molecularly investigated the effects of additives (Silane, Fillers) and surficial modification (Plasma treatment, Silylation) on the adhesion between polymer adhesives and substrates by FTIR, AFM, XPS, and SFG.
- ✓ Developed Python and C++ scripts to analyze the simulation results.

Lithium Battery (Collaboration with FORD)

- ✓ In situ and Ex situ characterized the formation and aging of the solid electrolyte interphase (SEI) at the molecular level using commercial electrolyte formulations, with the goal of optimizing SEI layer formation and enhancing the efficiency of lithium battery manufacturing.
- ✓ Investigated the additive effects on the growth and quality of SEI films.

Proteins (Collaboration with MERCK, BASF)

- ✓ Probed and analyzed antigen/adjuvant, antibody/substrate, and antifouling polymer/protein interactions at the molecular level to elucidate protein adsorption behaviors on various surfaces using SFG, CD, and FTIR.
- ✓ Applied Hamiltonian calculation to deduce the most likely orientations and conformations of the proteins on various substrates.
- ✓ Ran MD simulations by GROMACS to simulate the adsorptions of proteins on multiple surfaces.

TEACHING EXPERIENCE AND SOCIAL ACTIVITIES

- Joined Engineering SLATE program to volunteer as a mentor of minority students (2021-2022).
- Taught General Chemistry Lab as Graduate Student Instructor. (2021, 2022)
- Participated in the graduate student recruitment of Macro and Department of Chemistry.
